Summary

As a young and bright engineering student, I am eager to apply my problem-solving skills and positive attitude to work as a software development intern. My skill-set is diverse, including proficiency in programming languages such as C, C++, C#, JavaScript, and Python. I have hands-on experience with React as a frontend framework and Django and Node.js as backend frameworks. Whether working on independent projects or collaborating in a team, I am dedicated and self-managing, ensuring efficient and effective results.

Employment History

Freelance Software Engineer , Lagos Nov 2021 - Present

- Collaborate with a team of developers to build and enhance software products using C, C++, C#, JavaScript, and Python.
- Contribute to frontend development using React and backend development with Django and Node.js.
